

## ***Prevention, treatment and detoxification options for SARS-CoV-2, shedding, vaccine injury and long Covid***

A number of prospective in-clinic surveys of the homoeopathic remedies 2021VPN, 2022DOV, BUAU, PF, AZ, MD and NV, used for a variety of purposes when dealing with SARS-CoV-2, shedding symptoms and vaccine injury, were conducted in 2021 and 2022.

The background to remedy selection and administration is provided to give context to the results which were received from thousands of respondents.

In addition, Isaac's latest data regarding the treatment of long Covid and the treatment of vaccine injury caused by Covid vaccines will be presented.

It will be shown that homoeopathic options have much to offer in the prevention and treatment of SARS-CoV-2, the prevention and treatment of the effects of shedding by vaccinated people on both vaccinated and unvaccinated people and the treatment of injury caused by the various Covid 19 vaccines.

Some lessons learnt from the orthodox response to Covid 19 will be discussed in the light of these new research findings.
